## YOUR BENEFITS IN DETAIL:

- **No Initial Costs**  
Depending on the project volume, the relocation is free of charge for you.
- **Experience & Expertise**  
Years of practice in tool relocation and maintenance.
- **Everything from a Single Source**  
We support you from planning to production.
- **Rapid Production Assurance**  
Through a smooth transfer, you minimize the required safety stock and potential downtimes.

## THE 5 STEPS OF THE TRANSFER IN DETAIL:

1

### Quick Check

Based on product, tool, and delivery information, you will receive an initial price indication for series production and a timeline for the takeover.

2

### On-Site Assessment

Once authorized by you, the tool will be inspected by an independent consultant. We cover the costs.

3

### Binding Offer

The initial price indication is refined based on the gathered information, and you receive our binding offer along with a schedule.

4

### Relocation and Execution

After commissioning, we ensure safe and on-time logistics organization. On-site, the tool is reconditioned, and sample parts are produced.

5

### Production

After approval, process documentation is completed, and series delivery begins.
